

To the president of NTT Medical Center Tokyo

**Application for Appointment-based Treatment for the Department of International Healthcare**  
**国際診療科予約診療申込書**

When I receive outpatient care at your hospital, I would like to apply for an appointment-based treatment in order to secure the consultation time with the doctor of the International Healthcare Department.

【to be filled in by hospital staff】

Appointment date	yyyy mm dd ( ) :
Attending doctor	
Appointment fee	7,700 yen (first visit/re-visit)
Patient ID number	
Patient name	

Please submit this document to the hospital staff before the consultation.

Patients or payers, please apply after confirming the items below.

【Explanation】

- The surcharge for appointment-based treatment is "special or specialized medical care coverage" so it will not be covered by Japanese public health insurance. Therefore it will not be eligible to "high-cost medical expense benefit" and will not apply to a reduction of payment.
- This application form is necessary when reserving a first visit appointment for the Department of International Healthcare.
- Appointment for a re-visit will be considered as continuation of treatment and a surcharge for appointment-based treatment will be charged again.
- If the consultation starts 30 minutes after the appointment time due to hospital reasons we will not charge you for the appointment fee.
- If medical treatment (medical treatment such as consultation or examination) of greater than 10 minutes is not provided, the surcharge for appointment-based treatment will not be charged.

※Please fill in the box below.
